

Please note the following **information** regarding registration – valid for all study courses:

All students **must actively register** for all compulsory and elective lectures/courses using His-in-One (HiO - <https://hio.hsnr.de>) platform. **Only** on the basis of this registration all students will then receive important information about the lectures/course from their professors/lecturers, e.g. registration keys for moodle.

In certain cases, students may not be able to register by the start of lectures on 3 April. Therefore, it is possible to register after this date. All other students should register by 2 April at the latest to ensure a good semester start.

Please note the following HiO - registration periods:
