

Please note the following **information** regarding registration – valid for all study courses:

All students **must actively register** for all compulsory and elective lectures/courses using His-in-One (HiO - <https://hio.hsnr.de>) platform. **Only** based on this registration all students will then receive important information about the lectures/course from their professors/lecturers, e.g. registration keys for moodle.

In certain cases, students may not be able to register by the start of lectures on March 25. Therefore, it is possible to register after this date. All other students should register by March 25 at the latest to ensure a good semester start.

Please note the following HiO - registration periods:
